PAR

Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for NIH support. Comparative advantages and disadvantages, executive and legislative considerations, and paths forward for these options should be the subject of future reports.

Uncertainty and sensitivity analyses for age

These state programs have also undertaken measures to facilitate an understanding of the roles and responsibilities of the various potential players, including federal, state, and local law enforcement; state and local health agencies; state and local emergency response agencies; and water utilities.

Workshop on Synergies Between Alzheimer's Research and Clinical Gerontology and Geriatrics: Current Status and Future Directions

The following sections describe the identified promising options for strengthening nutrition research through 1 increased cross-governmental coordination; 2 increased authority, investment, and coordination within NIH; and 3 increased authority, investment, and coordination at USDA. Prediction Enhanced continuity of care Achieve continuity of care between providers, across installations, and with the civilian and VA systems.

Setting Priorities for Gerontological Social Work Research: A National Delphi Study

Of the 62 individuals invited to participate, 48 agreed and 46 actually did so. And, as discussed in the cross-governmental section below, the USDA FNS Center for Nutrition Policy and Promotion CNPP conducts the evidence analysis for the DGAs, including nutrition evidence systematic reviews, data analysis, and food pattern modeling, and develops the corresponding consumer-facing education tools e.
