Fungi in history

Mycorrhizal fungi are essential for the growth of most plants.

Types of Fungi

Animals have no cell walls; fungi have cell walls containing chitin; plants have cell walls containing cellulose. Conidiophores may be scattered in mycelium e. They are carried away by insects, wind or water to a reduced female gametangium, which may be a specialized hypha called receptive hypha.

Fungi: Biology Notes on Fungi

Not all mycologists agree with this scheme. All other fungi were considered by him as True fungi.

Biology of Microfungi

Some important vitamins and their sources are given below: a Vitamin B-complex.
