Deafness in mind : working psychologically with deaf people across the lifespan

Journal of deaf studies and deaf education, 7 4 , 330-345.

The term 'deaf' refers to profound hearing loss, implying little or no functional hearing

Deaf people use a variety of methods of communication, including Sign Supported English SSE , lip-reading, pen and paper, and light-writers to name a few. Austen S, Gray A, Carney S 2007 in S Austen and D Jeffery Eds Deafness and Challenging Behaviour: The 360° Perspective.

The social and emotional development of deaf children

Over the past 30 years, three specialist mental health service units for the deaf have been established in the United Kingdom.

Deafness and the justice system

In the case of a deaf child, it is the duty of the local authority to ensure that their policies and procedures allow them to effectively investigate and manage child protection, which requires effective communication with the child. The Journal of Deaf Studies and Deaf Education, 11 4 , 493-513.

Ethics in Mental Health and Deafness

These differences will influence the adaptations required to fully participate in proceedings. Hearing Link 2020, March 19.

Austen Psychology

In addition to his housing needs, there were other services that were considered necessary for Patient B that were not accessible for deaf people e. Acquiring deafness later in life may mean the individual does not associate themselves with the deaf community, as they have previously integrated

into the hearing community. Chichester: John Wiley and Sons Ltd.
