Orem's theory

Integrating educational technology within the learning environment is also a component of the course. Effective therapeutic nursing practice II. This combined clinical and theory course introduces nursing basic concepts and frameworks communication, safety, organization and nursing process.

An application of Johnson's behavioral model: a case study

Emphasis is placed on gathering reliable and relevant information; recognizing variations of normal findings; and identifying abnormal findings using common health problems as exemplars. It integrates the scientific, quality and independent practice competencies of the pediatric acute care nurse practitioner with an emphasis on leadership competencies. An elective focusing on the causes and extent of violence in the family, human responses to violence, the influence of culture and community on violence in the family and nursing interventions for the problem on the primary, secondary and tertiary prevention levels across the lifespan Areas of violence in the family to be examined will include child abuse, intimate partner abuse, sexual abuse, violence involving adolescent family members, abuse of elderly family members and homicide.

Master's of Science in Nursing (MSN)

Applicants who have completed a baccalaureate degree in a field other than nursing may also apply for the. Students will examine ways to reduce health disparities through resource utilization with consideration of both physical and social environments, diversity, equity, and access along the healthcare continuum. She is considered to be the first nursing theorist.

Master's in Nursing

The student can choose from a variety of opportunities. Students also emphasize health promotion, patient education, and disease prevention, screening of adult and older populations, and providing culturally competent care. Students will participate in 56-168 hours of clinical experiences as determined by a gap analysis.
