### Undergraduate Program : Academics

Computational Science and Engineering The is an interdisciplinary program for students interested in the analysis and application of computational approaches to designing and operating engineered systems.

### Department of Aeronautics and Astronautics < MIT

More than 60,000m<sup>2</sup> of buildings were completed within six months. Preference to first-year students in the Gordon Engineering Leadership Program. For this reason, much of the research and teaching in the Air Sector is motivated by the need to reduce energy use, emissions, and noise.

### Undergraduate Program : Academics

Our two educational thrusts include: lead development of the College of Computing education programs in autonomy and computational science and engineering; and develop education for digital natives and digital immigrants. We seek to foster an inclusive community that values technical excellence, and we research and engineer innovative aerospace systems and technologies that have world-changing impact. Most projects are found within the.

### Theory of Flight

Program Objectives The objective of the undergraduate aeronautical and astronautical engineering program is to prepare students for careers in aerospace engineering and related disciplines. The culmination of the 16-ENG degree program is our aerospace laboratory and capstone subject sequences.

### Aeronautical and Astronautical Engineering

Analyse various vehicle, system and assembly designs; compare their characteristics, advantages and limitations using valid criteria. Contact Information AAE Undergraduate Office Get On Our Mailing List As an aeronautical or astronautical engineer, you can work in aviation, defense, space exploration—even the automotive industry. In any year-abroad experience, students enroll in the academic cycle of the host institution and take courses in the local language.
