East African Pastoralism in Transition: Maasai, Boran, and Rendille Cases on JSTOR

Katharine Homewood has written a bold book of wide scope. Traditional pastoralist land use practices and designations give northern Tanzania much of its wild or wilderness character, which in turn is a central reason why this landscape both supports wildlife and attracts foreign tourists to the degree that it does.

Ecology of African Pastoralist Societies · Ohio University Press / Swallow Press

As of 2019, 200-500 million people practise pastoralism globally, and 75% of all countries have pastoral communities.

African pastoralist systems: An integrated approach

Numerous accounts from development projects have shown that such trade-offs can form an underlying source of tension in decision making and management Tallis et al.

Natural conservationists? Evaluating the impact of pastoralist land use practices on Tanzania's wildlife economy

She argued that a , such as grazing lands used for pastoralism, can be managed more sustainably through community groups and cooperatives than through privatization or total governmental control. If any components of ARCISS are to be salvaged, the High-Level Revitalization Forum must be drastically more inclusive than the original agreement, encompassing a sufficiently broad range of informal armed groups and outlining context-appropriate provisions to create a forum to evaluate their grievances. Likewise, a society that prefers a transhumance way of life may be forced by circumstances to change to a nomadic pattern for some or all of its livestock.

Ecology and Society: Kenyan pastoralist societies in transition: varying perceptions of the value of ecosystem services

These species had benefited from the presence of livestock and pastoralist land management practices. These communities also prey extensively on wild ungulates as a source of food, in contrast to pastoralists in Loliondo, who do not traditionally eat wild animals.

Ecology of African Pastoralist Societies · Ohio University Press / Swallow Press

We thus inferred that the communities did not have substantially different levels of forage production see Appendix 1 for details. There is a perceived need for international studies on the risks and impacts of climate change and extreme events on the sustainability of pastoralist communities in Africa, especially in eastern and southern Africa.
