### EHS Annual Report and Goals

For example, electric utilities, part of the stationary fuel combustion category, release SO 2, NO x and particles.

### Submit an Annual Environmental Report (AER)

That is enough electricity to power more than 11,000 homes for three hours. Since that time, the combined emissions of criteria and precursor pollutants have dropped by 77%. Update the process, the emergency coordinator tracking and provide training across campus.

### Submit an Annual Environmental Report (AER)

Short-term exposures to SO 2 have also been connected to increased emergency department visits and hospital admissions for respiratory illnesses, particularly for at-risk populations including children, older adults and those with asthma. Deposition of nitrogen oxides contributes to the acidification and nutrient enrichment eutrophication, nitrogen saturation of soils and surface waters. While you must provide an e-mail address for us to be able to provide a response, we recommend that you NOT include any other personal information, such as your address or home phone number and especially not your Social Security number.

### Submit an Annual Environmental Report (AER)

Ozone exposure also aggravates asthma and lung diseases such as emphysema leading to increased medication use, hospital admissions, and emergency department visits. At TVA, we are actively adjusting and expanding our business model to incorporate these resources and we are collaborating with LPCs on several renewable projects.
