Many are project oriented, as, for example, when a scholar studying the life of the pre-Roman, Celtic-speaking of France may deliberately select a group of hill forts and excavate them, as did in northwestern France in the years before the outbreak of. Among the most obvious archaeological sites that have yielded spectacular results by excavation are the huge man-made mounds in the , called in Arabic tilal and in Turkish tepes or hüyük. Rivard, then the director of the Old Slater Mill museum was one of the key figures in the founding of the.

## Archaeology

One of the first areas to be the subject of a systematic study of industrial archaeology was the in . He has acted as Principal Investigator or Consulting Scientist for grants awarded by the National Science Foundation, Wenner-Gren, National Endowment for the Humanities, and the Institute for Aegean Prehistory. He sits on the North York Moors National Park Archaeological Advisory Committee.

## Industrial archaeology

Introduction Industrial archaeology is a relatively new field, originating in the United Kingdom in the 1950s, when the postwar preoccupation with renewal had led to the destruction of much of the landscape associated with early industrialization.

## The techniques of industrial archaeology : Pannell, J. P. M. (John Percival Masterman), 1899

Amateur archaeology is forbidden in many countries by stringent antiquity laws. The museum was founded by a group of business leaders with ties to the textile industry, during a period of decline due to Southern competition.
