drives up global greenhouse gas emissions

Rapid deployment of renewable energy and is resulting in significant , , and economic benefits. This growth in per capita energy consumption does,

however, vary significantly between countries and regions.

Total Energy Annual Data

Energy in this case refers to all energy types, both renewable and non-renewable.

Which Countries Have the Highest Subsidies for Fossil Fuels?

Coal-fired power station utilisation, already in decline in most major economies outside China, Japan and India, has fallen back sharply, and especially in China in the early months of the pandemic. The reduction of roadside verge-cutting will assist some plants, including native wildflower species.

Energy Independence

This paper presents the results of a study in the factors affecting the cooking energy choice of households in Bauchi metropolis, North-east Nigeria. Transportation makes the biggest difference. The variations of household carbon footprint from 1995 to 2014 were largely driven in transportation use, including emissions from vehicle manufacturing, fuel and public transportation.
