**Canada**

Historical data point to a narrowing of the gap between 1981 and 2001.

**Correctional Service of Canada CSC Research**

Most likely because of differences in offence type and criminal history, the current aggregate sentence length is significantly shorter for incarcerated visible minority offenders than Caucasian offenders.

**Information archivée dans le Web**

Industry began moving out of the city in the 1970s and 80s because of economic and increasing global competition in the manufacturing sector. In 1981, Community A had a score of 0 and Community B had a score of 100.

**Canada becoming more culturally diverse: Census**

Data on other visible minority groups, including Pacific Islanders, are collected in the 'Other - specify' area of the 2016 Census population group question.

**Canada becoming more culturally diverse: Census**

Immigration has been the biggest contributor to the rapid growth of the visible minority population in Canada.
