Why Cultural Competence in Social Work Is a Vital Skill

Cognitive Overload: The Cost of Complexity Vastly increased access to information has made work both easier and more difficult. Often these programs are part of agencies that emerge from informal or formal institutions in the minority community, and have particular philosophical approaches that promote the well being of that specific population. This material may be freely reproduced and distributed.

HIV and AIDS

Franklin and Paula Allen-Meares Children in Protective Services: The Missing Educational Link for Children in Kinship Networks Barbara Rittner and Arlene Sacks Maintaining Positive School Relationships: The Role of the Social Worker vis-à-vis Full-Service Schools Jill Duerr Berrick and Mark Duerr Homeless Children and Their Families: Delivery of Educational and Social Services through School Systems and Communities Jack C. While innovative community-, workplace-, and home-based testing approaches have been tried see , expanded access to HIV testing has required massive investments in health BOX 4-1 Innovative Testing Approaches An innovative strategy for prevention being used in the Democratic Republic of the Congo is mobile HIV testing.

Why Every Social Worker Should Be Challenged by AIDS

Regardless of the programmatic successes seen to date, moreover, Veenstra and colleagues 2010 remind us that, in addition to weaknesses in health and drug supply systems, other crises in African countries can further compromise the delivery of ART programs, leading to drug resistance, treatment failure, and additional burdens on the health system. Extreme poverty cannot be overcome by material aid and capacity building alone, nor can poverty reduction initiatives be successful unless they are based on the recognition of the inherent dignity and on the equal and inalienable rights of all members of the human family as expressed in the Universal Declaration of Human Rights preamble. Journal of Clinical Nursing 15 6 :735-741.

Challenges for evaluating effectiveness in social work

Most of the sickness and death caused by the infection is in adults of re productive age.
