The Sectional Committees may refuse to place the title of any paper on the programme ; but every such title, with the abstract of the paper or the paper itself, must be returned to the Council with the reasons why it was refused. This species combines the more efficient graminoid photosynthetic system and a less drought-resistant mechanism with some of the cushion plant energy-trapping characteristics such as tufted growth form and persistence of dead leaves, with consequent thicker boundary layer. Lawrence, Louis Lang, Robert J.
