Race Talk: Engaging Young People in Conversations about Race and Racism

Those courses also provide models for how science should be taught. These standards are also criteria for state and national policy makers who determine important policies and practices, such as requirements for teacher certification and the budget for professional development. Through the combination of contemporary reading material, survey of six national culturally specific museums, synchronous and a-synchronous discussion forums and guest speakers, students will discuss some of the ways in which culturally specific museums help make up the fabric of culture represented in museums in the United States of America.

4 Standards for Professional Development for Teachers of Science

Students in this course will learn the steps needed to design sound educational programming in museums, including developmentally appropriate learning theory and strategies for audiences such as children, families, adults, teachers, and students. In this course, we will explore social media trends and their relevance for museums, including marketing, fundraising, education, and curatorial functions.

4 Standards for Professional Development for Teachers of Science

The Core Courses offer you a grounding in the theory and practice of museums in a changing technological, social, and political environment — emphasizing the role of technology throughout the museum. As you consider these areas of growth for your business, consider how they apply to your own professional development.

8 Effective Professional Development Strategies

When there is a solid Big Idea that grounds the exhibition and when the labels have been edited through a process of evaluation. However, effective teachers know how to access research-based resources and, when faced with a learning need, pursue new knowledge and skills that are based on research or effective practice.
