### Blue Whale

They are among the loudest animals on the planet, emitting a series of pulses, groans, and moans, and it is thought that in the right oceanographic conditions, blue whales can hear each other up to 1,000 miles away.

### Whale Marine

Such dives can last more than an hour. The best available science suggests the gestation period is approximately 10 to 12 months, and that blue whale calves are nursed for about 6 to 7 months. They may face inwards with their tails out the 'marguerite formation', named after.

### Whale Species

Such a feature would be very helpful in adapting buoyancy for diving deep and swimming up again.

### Blue whale facts for kids

The conservation outlook is brighter than for many other whales. The knobbly surface reflects sound waves that come through the spermaceti organ from the phonic lips.
