Color atlas of veterinary histology

Each photomicrograph is accompanied by explanatory captions that guide students to the key morphologic features that identify the function of the structures. In each, you'll find these features: a brief overview of normal histologic findings; color micrographs of typical pathologic changes; corresponding text which highlights details in the illustrations; line drawings correlated to histologic findings, gross pathology or pathologic processes; and a focus on the most common diseases and their pathophysiologic details. Key points Provides undergraduate medical students with an understanding of histological structures and functions of tissues Covers all different tissue types in various systems of the body Includes sample histology slides to enhance learning Multiple choice and descriptive questions assist revision Color Atlas of Veterinary Histology Book Review. Designed to provide students with a foundation in understanding and interpreting histologic and cytologic preparations, Color Atlas of Veterinary Histology is a practical benchside reference focusing on the normal histology of eight common domestic species.

Color Atlas and Text of Histology
