What can speech production errors tell us about cross

The international guide to speech acquisition. You may also contact ASHA at for assistance with contacting your payer. The EPG patterns were classified according to certain criteria, such as the presence or absence of complete constriction between the tongue and the hard palate, and the area and location of this contact.

Understanding Assessment: How Does Linguistic Bias Affect Language Evaluations?

Auditory-linguistic sensitivity in early infancy. Nine errors were semantic and one mixed. These parts describe the main characters, the setting in which they live, the conflict, and the resolution.

Cross-linguistic study of lateral misarticulation using electropalatography, International Journal of Language & Communication Disorders

Phonetica, 36 2 , 98-114. Acoustically, misarticulations in both languages were characterised by a lower frequency of peak energy than would be expected in normal productions. Analyse des variables temporelles du français spontané II.

Cross-linguistic study of lateral misarticulation using electropalatography, International Journal of Language & Communication Disorders

This white paper will examine the critical role of oral language in reading instruction and assessment and the implications for classroom teachers.

Linguistic Feature

Seminars in Speech and Language, 30, 174—186.
