Mac OS 9

Expand them under Mac OS to be safe. Notification Center, which makes its debut in Mountain Lion, is a desktop version similar to the one in iOS 5. They will get damaged and lose their resource fork, rendering them useless.

Mac OS 9

It is the first version of macOS not to support 32-bit applications. LTR indicates usage with left-to-right languages: that means text flows from left to right, such as in most Western languages. Typically, this isn't seen in keyboard shortcuts because it's primarily used to access keys F1 through F20.

Mac OS 9.2.2 Universal (2002 edition)

The final updates to Mac OS 9 addressed compatibility issues with Mac OS X while running in the and compatibility with applications.

Mac OS 9

TXT These are the official Unicode symbol mappings published by Apple. The others use standard Unicode combining techniques.
