How emerging technologies impact the future of nuclear risk and arms control

Statements made during the presidential campaign suggested a probable reassessment of nuclear weapons policy by the incoming administration. March 21, 2017 at 7:39 pm Sir, I think that is one of the main things that needs to be fleshed out. Researchers developed target matrices to illustrate some potential future targeting strategies to address these challenges.

The Decline of Deterrence

The Future of the Undersea Deterrent: A Global Survey

The long peace that has extended from 1945, when nuclear weapons brought an end to the worst world war in history, continues today. The objection is that the deterrent threat is ultimately based on inflicting serious harm on innocent people without their consent, taking them as hostages, and therefore degrading them to a mere means. Furthermore, reprisals must be proportional to the unlawful conduct of the other party.

The Future of the Undersea Deterrent: A Global Survey

That a nuclear attack has not happened may be a result of any number of other factors, or simply of exceptional good fortune. Counterforce strategies are, as their proponents argue, a way out of the fundamental moral dilemma posed by nuclear deterrence. The shift toward a multipolar world is particularly pronounced with regard to nuclear weapons.
