## Did you solve it? Think of a number

If a book doesn't make your blood run cold and keep you at the edge of the seat how on earth can you enjoy it to the fullest? But what about surreal numbers? Soon, Flemming is embroiled in a dangerous game that, in addition to the vengeful bank robber, also involves the police and a mysterious, beautiful woman. Both my sons were tutored by me for the 11+ they went to a local grammar school.

## Think of a Number: What are the Odds that it is Even?

Something a little more unique. Have somebody hold the envelope and at the end ask them to open it and reveal the number you wrote at the beginning.

## Think of a Number: What are the Odds that it is Even?

On one side of the paper may be the number 3 and the other side may have the number 7. When asked to pick a number between 1 and 4, 3 is the most common choice. It is the first baffling aspect of this case.

## Can you solve it? Think of a number

Unfortunately after suggesting he take an art class with her, his wife is not happy with the path that class has taken. Not related to any Media or Corporation. So, we could try But now the probability for finite sets and, in particular, for any specific number, is zero.

## Think of a Number!

My real name is not your name here. Overall, though, this is a series worth continuing, despite the risk of falling back into my mystery addiction .

## Think of a Number

Shocked, I glance up from my book as the soft platter on the chimney has turned into what sounds like an AK-47 ripping apart my house. Gurney says it's more like hell. But as the story progresses and things start coming to light, Gurney is sometimes painfully slow on the uptake, which is a big

source of frustration for the reader.

### **Think of a Number**

Subtract twice your number from that. If you've read this review of the Dave Gurney series, than you've read 'em all. The students noticed how my tricks always came back to the original number or a specific number and they want to try and make their own versions of these.

#### **'Think of a number' trick**

Dave Gurney is a retired detective. Try it again with another starting number — the answer is ALWAYS 2. If you would like to suggest one.,
