Chaudhuri has received research grants from NSF, ARO, FAA. He served as the Chair for the department of mechanical engineering between 2002 and 2011, overseeing unprecedented growth of its educational program as well as the establishment of several research centers, including the Aeropropulsion, Mechatronics and Energy Center which he currently serves as Director. Kyle Wetzel Kyle Wetzel is recognized for his original contributions to the development of advanced wind turbine airfoil aerodynamic designs and turbine blade manufacturing.

One is sustained and outstanding research contributions on unsteady flow and aeromechanical vibrations in turbomachinery and gas turbine engines, including first-of-a-kind descriptions of instabilities in axial and centrifugal compressors, rotor whirl, and acoustics of novel aircraft. In scholarship he has published a large number of articles some of a pioneering nature in engineering journals. Zimmerman is a recognized leader in the

research and development of plastic product engineering, as well as in education.

Partial list of Fatigue Publications

The required basic strain-controlled data for both non-irradiated and irradiated Zircaloy-2, -3, -4 were obtained for temperature between 70 F and 600 F. Pen-Sang Lam Poh-Sang Lam is an expert in areas of nonlinear fracture mechanics and computational methods at Savannah River National Laboratory. Demuren has made contributions in three broad areas: Complex turbulence flow computations with Reynolds stress modeling, environmental fluid mechanics through modeling of jets in cross flow, and analysis and development of numerical methods for CFD applications.

Finite elements in the analysis of pressure vessels and piping—a bibliography (1976)

Expert testimony was also provided in litigation resulting in a court decision requiring the designers of the original system to pay damages to the furnace owner. Benda has also made long term contributions to the Environmental Engineering Division and the Honors Committee.

Finite elements in the analysis of pressure vessels and piping—a bibliography (1976)

Swisher Harnetty is a leader in coal gasification product strategy and optimization.

ASME 2014 FELLOWS [Mechanical Engineering]

He has contributed to the understanding of delayed hydride cracking and creep of Zr-Nb pressure tubes.

Partial list of Fatigue Publications

In addition, he has been appointed as honorary professor at the University of KwaZulu-Natal, Durban, South Africa. Leonard has worked in the design of large commercial HVAC systems for high-rise buildings, in the mechanical design of missile service equipment, and the improvement of equipment used in the pulp industry for manufacturing paper. Strength reduction factors are given as a function of the crack depth, section width and type of loading.
