## NRC Celebrates A Milestone — 40 Years of Safety and Service

Plants With Safety Significant Concerns CASE 1. NRC Coziness, December 1987, p.

### Safety goals in 'risk'

The graphic portion 404 of the display contains the past risk profile 406, the current risk level 408, and the projected risk profile 410.

### Analysis of the structural girders of a crane for the license renewal of a BWR Nuclear Power Plant

However, since the establishment of the original design criteria, additional loading conditions were identified that must be considered for the pressure-suppression containment-system design. More than one-half of INPO's twelve-member Board of Directors also sit on the Board of Directors for NEI.

### Regulatory and Licensing Strategy for Microreactor Technology (Technical Report)

The NRC will hold four public meetings to receive comments on the draft GEIS one in each of the NRC regions. Topical Report WCAP-10271, Supplement 1. On April 10, 1981, the NRC staff sent a generic letter to all BWR applicants and licensees requesting them to provide their plant-specific responses addressing the concerns identified in NUREG-0785.

### Analysis of the structural girders of a crane for the license renewal of a BWR Nuclear Power Plant

The NRC map and table below identify the locations of all plants.
