Space : NPR

The essay competition aims to stimulate thought, discussion and debate on matters relating how the Space Force and Air Force provide space capabilities for the joint force and the nation. When people travel in space, they seem to become weightless.

Space : NPR

Computer simulations and observations indicate that up to half of the atomic matter in the Universe might exist in this warm—hot, rarefied state.

Space Facts

The remainder forms huge voids that are mostly empty of galaxies. The latest discoveries and interesting space-related features can be found on the blog, while the gallery highlights graphics and diagrams that illustrate more aspects of the universe. There is no oxygen in space, so all crewed spacecraft carry a life-support system.

The latter role serves a wide variety of purposes, including tracking soil moisture for agriculture, prediction of water outflow from seasonal snow packs, detection of diseases in plants and trees, and of military activities. Outside a protective atmosphere and magnetic field, there are few obstacles to the passage through space of energetic known as cosmic rays.

Space

The service module carried equipment, fuel, and a rocket motor.
