5 Day Intensive Plumbing Course

He said it definately is achievable to have a Sealed system and wood burning CH system running, as his own parents have a Bosky and have been running it with a sealed GCH system for years!! Oversizing radiators was the norm during the Roaring '20s, but when the Great Depression arrived—and because the Spanish Influenza never returned—people began shutting their windows to save fuel, and all those oversized radiators working overtime made it pretty hot inside. In parts of Scotland, a design temperature of -2°C is more sensible; and in the West Country, 0°C may be sufficient.

Electrician Courses for Beginners
