## Engaging Young Learners Through Inquiry

This report has focused on synthesizing and translating this evidence base into a usable form that can be used to guide a national effort. Teachers in early childhood settings need a sound understanding of mathematics to effectively capture the learning opportunities within the child's environment and make available a range of appropriate resources and purposeful and challenging activities. If they are developing, simply observe and leave the children alone.

## 10 Things to Know About Math

Based on years of research with early childhood teachers, author Allen Rosales provides an approach to create an emergent math curriculum that integrates children's interests with math concepts. She then started adding more blocks from the opposite side of the board, and found herself stuck with a gap in the middle that was smaller than any of her blocks.

## Mathematics for young children: an active thinking approach by Bird, Marion

These aspects of play can promote thinking and learning in mathematics as well as in other areas. The yellow ones are the contrast, but they are all the same size.

## Teach young children math through play—it's easy with LittleCounters®

Interesting items in the environment encourage children to find answers to their questions and solve problems across all curricular domains.
