## The mysterious link between breast and prostate cancers

In postmenopausal osteoporosis, there is an increased rate of bone remodeling and an imbalance between bone resorption and bone formation that results in a net loss of bone.

## Is stage 4 cancer curable? Survival rates and treatments

The remodeling process occurs under control of several hormones and cytokines that are active within the bone microenvironment. Headley JA, Theriault RL, LeBlanc A, et al: Pilot study of bone mineral density in breast cancer patients treated with adjuvant chemotherapy.

## Osteoporosis in Breast and Prostate Cancer Survivors

For most men with prostate cancer, treatment can remove or destroy the cancer.

## Survival Rates for Prostate Cancer

Implications for cancer survivors: There are important differences in the experience of patient-centered care among cancer survivors that should be considered when planning care models and interventions for these different populations. Ockrim JL, Lalani EN, Banks LM, et al: Transdermal estradiol improves bone density when used as single agent therapy for prostate cancer. If you are thinking about taking any type of nutritional supplement, talk to your health care team.

## Predictors of falls in older survivors of breast and prostate cancer: A retrospective cohort study of surveillance, epidemiology and end results

Calcif Tissue Int 58:409-414, 1995. However, we do know that a healthy diet can have positive effects on your overall health, with benefits that

extend beyond your risk of prostate or other cancers.

### **Second Cancers After Prostate Cancer**

Headley and colleagues evaluated 27 patients with breast cancer treated with adjuvant chemotherapy who were premenopausal at the time of diagnosis.
