The Psychology of Emotional and Cognitive Empathy

According to the cognitive appraisal theory, emotions are judgments about the extent that the current situation meets your. More specifically, this theory claims that physiological arousal is cognitively interpreted within the context of each situation, which ultimately produces the emotional experience. We humans share them, regardless of our culture or society.

Emotion (Stanford Encyclopedia of Philosophy)

Despite different emotional display rules, our ability to recognize and produce facial expressions of emotion appears to be universal. He had served both as a flight instructor and the safety chairman for the Airline Pilots Association. Journal of Personality and Social Psychology, 54 5 , 768—777.

List of emotions and feelings

Translated as The Emotions: Outline of a Theory, Bernard Frechtman trans. Vocabulary Cultural display rules These are rules that are learned early in life that specify the management and modification of emotional expressions according to social circumstances. In fact, working too much can.

Six Keys to Expressing Your Emotions

The readings of the barometer are feelings, understood as blends of pleasure-displeasure and activation-deactivation.

The Psychology of Emotional and Cognitive Empathy

There are better and worse examples of emotions as ordinarily understood e. Emotions influence our thinking processes, sometimes in constructive

ways, sometimes not. Increased amygdala activity is associated with learning to fear, and it is seen in individuals who are at risk for or suffering from mood disorders.

Emotion

This preference was associated with no increases in amygdala activation. Being afraid of a shark swimming alongside you is fitting, because the shark is dangerous. For example, Frank 1988 has described the expression of sympathy as a mechanism to convince potential cooperators that one will behave honestly in future interactions even in the presence of temptation, and the expression of anger as a mechanism to convince potential cooperators that one will behave aggressively if messed with even when aggression is costly.
