## Reduction of Losses in Fresh Market Fruits and Vegetables, Annual Review of Phytopathology

Reduction of Losses in Fresh Market Fruits and Vegetables Reduction of Losses in Fresh Market Fruits and Vegetables Harvey, J M 1978-09-01 00:00:00 Box 8143, Fresno, California 93727 World food shortages accentuate the need for reducing postharvest losses and developing improved systems for transporting and distributing food to areas where such shortages exist 73. Do not share towels Soap combined with scrubbing helps dislodge and remove dirt and germs. Fresh commodities have individual requirements with respect to temperature and other factors that must be provided for during the marketing process.

## Review of Post

As with any type of packaging, we recommend that controls be put in place to ensure that the process of packaging the product and the packaging materials themselves do not cause the product to become contaminated. Pre-harvest spraying of fungicides can result in significant reduction of the pathogens in the harvested produce. Factors affecting Post-Harvest Loss In general, post-harvest losses of fruits and vegetables is influence by many factors.

## Guidance for Industry: Guide to Minimize Microbial Food Safety Hazards of Fresh

Florida State Horticulture Society 127:139-141.

## Post Harvest Management for Fresh Fruits, Vegetables and Root Crops

But rigid LDPE films that have higher O<sub>2</sub> and CO<sub>2</sub> transmission rates are more durable. However, some chapters in the guidance discuss physical and chemical hazards. This point of origin can be part of the plant above ground i.

## **Post Harvest Management for Fresh Fruits, Vegetables and Root Crops**

Therefore, during harvesting of vegetables, care should be taken to avoid mechanical damage.
