### Hospital discharge and patient safety: reviews of the literature

Areas for Future Research and Potential Data Sources Key informants suggested interviewing individuals from other agencies to learn more about illegally unlicensed personal care homes or to obtain potential lists of illegally unlicensed personal care homes. Additionally, some of what we heard about policies that affect demand for and supply of unlicensed care homes was based on the opinions of the individuals interviewed and may not be representative of others' views, and we do not have data to support these viewpoints.

### Delivering integrated care: Role of the multidisciplinary team

This key informant indicated that this change likely increased the need for licensed group homes, and unlicensed group homes may have also opened as a way to fill the need created as a result of these closures.

### A Unit Guide To Infection Prevention for Long

While exploratory in nature, the findings highlight potential issues of safety, abuse and financial exploitation in unlicensed care homes. Learn more from your nursing home's. In California, assisted living services can be provided by a licensed home health agency in unlicensed publicly subsidized housing low-income housing projects, apartment houses, retirement hotels, village models, and private homes.

### Hospital discharge and patient safety: reviews of the literature

Complaint calls are received by each participating agency, therefore the team meets monthly to share complaints about potentially illegal unlicensed care homes. Managing the care needs of low-income board-and-care home residents: A process of negotiating risks.

## **Anticipatory Care Planning: Frequently Asked Questions**

Similarly, poor communication between the hospital and social care providers is a long-standing risk factor in adverse events.

### **Long**

Thus, unlicensed care home operators are known to directly market themselves to hospitals and to pick up patients at the hospitals when they are discharged, and some hospitals have been known to pay a month of the residents' fees at the unlicensed home to secure a quick discharge from the hospital. Fungi can cause skin and nail infections, as well as other types of infections, especially in people with weakened immune systems.
