Given the increase in the number of techniques, and their diversity of applications, there is a need for a comprehensive volume to address both the technology and function of their use. Invasive Studies of the Human Epileptic Brain is the definitive reference text on the use of invasive electroencephalographic EEG diagnostic studies in human epilepsy.

**Stereoscopic Atlas of Neuroanatomy**

Brain areas are shown in coronal, sagittal, and horizontal planes. For the first time in any species, this atlas depicts the fate-mapped natural embryonic boundaries in the postnatal brain.
