## Microsurgical Tubal Reconstruction

Although conservative treatment including lymphatic massage and compressive elastic garments have been advocated for first-line treatment of lymphedema, the long-term results of such decongestive therapy have not been uniformly encouraging. The neurosurgeon places a titanium clip across the neck of the aneurysm.

## Microsurgical procedures

The floor-mounted microscope and the operating table should not interfere with the surgeon's access to the pelvic structures and ability to manipulate the microsurgical instruments. Only after patency has been established in the remaining resected segments and their ends examined microscopically to ensure that they are normal can the anastomosis begin. .

## Microsurgical Reconstruction
