## 2.4 Cataloguing

The consolidated ISBD simplifies the application of ISBD and reflects the increasing significance of electronic carriers for all content types. Analytic description permits a analytic record for the individual sound to be linked to the catalogue records for one or more host s.

### International Standard Bibliographic Description

Typically, such information takes the form of a series of declarations, identifying a code with some more complex structure or description. As well as being used to record the time when a resource was created or last modified, dates are also used to record administrative data about the metadata itself.

### International Standard Bibliographic Description (ISBD)

Most of the additions and changes have appeared in the UNIMARC Manual Update no. A symbol or other matter that cannot be reproduced by the typographic facilities available normally, characters that are neither numeric nor alphabetic is replaced by its description or its equivalency in letters or words, as appropriate.

## 2.4 Cataloguing

For the punctuation of scripts written from right to left, see 0. This applies even if the other title information relates to more than one work. Changes relating to the character code or physical storage details, corrections of misspellings, simple changes in the arrangement of the contents and changes in the output format do not normally constitute a new edition, whereas the addition of new information e.
