Decision

Fidelity, as applied to healthcare, is a dynamic process: and the way in which a therapist maintains fidelity in treatment

changes as treatment changes. The assumption behind EBMgt is that the closer the various producers and users of evidence work together, the greater the chance of increasing the quality of decisions Baba and HakemZadeh , p. Journal of Business Ethics, 66 1 , 89—98.

Even with the best possible clinical assessment, the level of consciousness can still be underestimated. Structural equation modeling in practice: A review and recommended two-step approach. In short, practices become praxis when phronesis and dialectics are needed see Eikelund.

Psychological Perspectives on Ethical Behavior and Decision Making

Finally, there has been scant recognition of the relationship between scientific research and practice, even though a close link was the original aspiration.

Explain the importance of understanding your personal ethical perspective.

If you can grasp the basic ideas of each of the different approaches to ethics, you will be in a better position to make a sound ethical decision.

Ethical Leadership Part 1

Journal of Business Ethics, 93 3 , 401—406.
