Unlike adjuncts, they are necessary to complete the meaning of a given sentence. One revolves around defining structural characteristics of two types of VP ellipses in Japanese in construction with soo-da so-be. The availability of this interpretation, we have demonstrated, eliminates the otherwise plausible analyses of VEAs in terms of pros and argument ellipsis in favor of our TP-ellipsis analysis.

Second, there are several elements which express repetition again, re-, anew ; this makes it possible to contrast the behavior of these elements.

Week 5 syntactic and semantic role of clause elements (with key)

Coupled with obligatory late insertion of focus-sensitive and disjunctive operators, this derivation yields mandatory wide scope of the moved

phrases with respect to negation. This ubiquitous scope reversal pattern indicates that certain instances of head movement in Japanese are syntactic, contrary to the view , that head move-ment is to be relegated to the postsyntactic, phonological component.
