**Amazon.co.jp: Applications in Fluid Mechanics and Field Problems: Proceedings of the Twelfth International Conference on Boundary Elements in Engineering, held at Hokkaido Univ., Sapporo, Japan, during 24**

. The 12th International Conference on Boundary Elements in Engineering held at Hokkaido University, Sapporo, Japan during 24-27th September 1990 reviewed the latest developments in the technique and pointed out advanced future trends.

**Boundary Elements XII: Proceedings of the Twelfth International Conference on Boundary Elements in Engineering, Held at Hokkaido University, Sapporo, Japan during September 24**

The Boundary Element Method has become an accepted and powerful method for the solution of many engineering problems. Recent theoretical and computational developments have transformed the BEM from a technique purely for research into an efficient tool for engineering design. This book of proceedings on boundary element methods, fluid mechanics, field problems, stress analysis, dynamics is intended for researchers and practising engineers and industrial users of boundary elements.
