Vivid scrolls from Japan tell timeless stories

The first scroll, which depicts the , is one of the most renowned in the art of emakimono, due to its mastery of movement and setting up of the narrative to the climax: the fire, which spreads over almost the entire height of the scroll in the scene shown here. Nevertheless, the life of these artists remains poorly known, at most they seem to be of noble extraction. Many examples focus on an individual protagonist and have a single plotline, often based on a tale of personal transformation.

How to Care for Japanese Scrolls and Screens, Part 2 of 2

Proselytising, favoured by the emergence of the Pure Land Buddhist sects during the Kamakura era, changed the methods of emakimono production, because works of proselytism were intended to be copied and disseminated widely in many associated temples, explaining the large number of more or less similar copies on the lives of great monks and the founding of the important temples. Its customs can be traced back to several ancient religious observances, including a festival that was held on the first snake day of the third month in the lunar calendar.
