The school leadership library Problem analysis - responding to school complexity

Notes: Includes bibliographical references (p. 155-165).

This edition was published in 1997

+ complexity	volatility
Characteristics: The situation has many causal factors and many effects. Some information is available or can be predicted, but the volume or nature of it is unknown.	Characteristics: The challenge is unpredictable. There is a long period of unknown duration, but it's not necessarily hard to understand. Knowledge about it is relatively easy to obtain.
Example: You are doing business in many countries, all with unique regulatory environments, traffic, and cultural values.	Example: Price fluctuates after a natural disaster takes a supplier off-line.
Approach: Restructure, bring in or out resources, and make sure you have the resources adequate to address the complexity.	Approach: Build in slack and devote resources to preparedness—for instance, stockpiling or diversifying resources. These steps are typically expensive; your investment should match the risk.
HOW MUCH DO YOU KNOW ABOUT THE SITUATION?

Problem Analysis

Academy of Management Journal, 49 3 : 433—458. Meaning structures in a contested issue field: A topographic map of shareholder value in Austria.

Institutional Complexity and Organizational Responses

Complicated Contexts: The Domain of Experts Complicated contexts, unlike simple ones, may contain multiple right answers, and though there is a clear relationship between cause and effect, not everyone can see it. It was the right approach for a complex context: He allowed solutions to emerge from the community itself rather than trying to impose them.

A Leader's Framework for Decision Making

Sometimes I have had to abandon my old perceptions in order to move on and develop my thinking further... This has happened for me e. Each situation we encounter is not radically different from the ones we have just encountered but nor is it exactly the same as those we have just encountered. American Journal of Sociology, 104 5 : 1398—1438.
