CiteSeerX — On the emergence of the second position cliticization in Slavic

Cambridge, MA: Massachusetts Institute of Technology dissertation.

Head movement to specifier positions

Verb doubling in Mandarin Chinese. I demonstrate that it allows both for a simpler and less stipulative theory of movement and for an understanding of the similarities between syntactic head and phrasal movement.

do second

Such an account would require additional stipulations to account for why the order of the participle and the two auxiliaries does not comply with the Mirror Generalization. Participle movement and second position cliticization in Serbo-Croatian. Cambridge, MA: Massachusetts Institute of Technology dissertation.

Participle movement and second position cliticization in Serbo

The upshot is that all differences in clitic placement among the languages in question i. We were among the first university presses to offer titles electronically and we continue to adopt technologies that allow us to better support the scholarly mission and disseminate our content widely. It is, however, worth pointing out that there is agreement in the literature that wh-phrases immediately precede the finite verb or auxiliary , presumably because they occupy the specifier of the head that hosts the finite element.

A Landing Site Theory of Movement Rules on JSTOR

As a result of this A-over-A-like condition, head movement of X is blocked. Yet, for XP movement to be prevented in this case, XP must not bear this feature, meaning that the relevant feature fails to percolate from X to XP as the result of projection.

do second

Could participle fronting in Bulgarian involve movement of the verb phrase that contains the participle and , as shown in 10? Unspecified categories as the key to root constructions. Given this, it can be claimed that what undergoes fronting is the VP projection which is the complement to the auxiliary and which only contains V. The chapter ends with two appendices.
