Blood Substitutes

As you can see in the medical article reprinted in the Appendix, on pages 27-9, based on an earlier analysis, Dr. The method of obtaining the starting material for the polymerization, stomal-free hemoglobin, from cells includes isolating it substantially free of cellular debris and stroma. The need for the blood substitute exists for replacing blood lost by acute hemorrhage, to replace blood losses occurring during surgical operations, in resuscitation procedures after accidental blood loss, for supplying oxygen, and generally to maintain blood volume in related conditions.

Blood and blood substitutes for treating hemorrhagic shock

In addition, the use of this term is misleading, especially to the public, raising the question as to the necessity for contributions of blood for military and civil defense use or even for friends and relatives. This application and the related application are assigned to the same assignee.

Blood substitute and blood plasma expander comprising polyhemoglobin

Similarly, the use of synthetic substitutes is associated with disadvantages. Perioperative blood transfusion in cancer patients undergoing laparoscopic colorectal resection: risk factors and impact on survival. By the way, coconut water is very different from coconut milk.

16.6B: Plasma and Blood Volume Expanders

Throughout the studies, the rat's mean arterial pressure was continuously recorded via one femoral artery, and the other artery used to withdraw blood.

US5945272A

Following denaturation, electrophoresis through polyacrylamide gel separates the covalently cross-linked aggregates on the basis of molecular size. Then, 1 ml of solution A was diluted with 9 ml of distilled water. The solution according to claim 1, wherein said potassium is present in an amount ranging from about 0-3.

Quality Alternatives to Transfusion

Waitz Hal Sternberg Judith M.

What is Plasma Expander and its Properties

Hemolink Cross-linked human Hb Phase 3 trials completed. Hemospan: design principles for a new class of oxygen therapeutic.

Supra

SURGERY, YES—BUT WITHOUT TRANSFUSIONS Many people today will not accept blood.
