## **Age determinations and geological studies : K**

New Brunswick Department of Natural Resources and Energy, Mineral Resources, Information Circular 91-2, p.

**Geolex — HarmonyHills publications**

Age determinations and geological studies, K-Ar isotopic ages, report 15. Woodmorappe's citation of this data, out of its geologic context, is misleading and a cursory examination of the cited source clearly shows that this information in no way supports Woodmorappe's thesis that radiometric dating, in general, is unreliable. In Age Determinations and Geological Studies.

**Geolex — HarmonyHills publications**

Age of the Catalina Island Pluton, California. Rb-Sr age of the New Hampshire plutonic series.

## NB Bibliography Search Results

Woodmorappe wants to imply that a correlation between K-Ar and Rb-Sr dating results have no meaning. Rapid pyrolysis of New Brunswick oil shale. An analogy I like to use is that of a wooden yardstick and a flexible tape measure.

## **Age of the manicouagan and clearwater lakes craters**

Further information: Potassium naturally occurs in 3 isotopes:  $^{39}\text{K}$  93. Reading the paper shows that this is simply another example of Woodmorappe citing an example yet not discussing its geologic context thus giving a false impression of its reliability. Comprises several compound cooling units: the upper, less welded units belong to Table Butte Tuff Member and the lower, more welded units belong to Narrows Tuff Member Williams, 1967; Anderson and Rowley, 1975.

#### **8.4 Isotopic Dating Methods**

The book has no publisher's information page but it seems clear from the Forward, written by the well-known young-earth creationist Henry Morris, that it was published by the in 1993. My experience with young-earth creationists is that their arguments are almost always based on obsolete data, a misrepresentation of the facts, and a willful ignorance of contrary data.
