. It contains a compelling mix of analyses of behavioral data, original field observations,

### **Wolves in Wood Buffalo National Park (Alberta and Northwest Territories, Canada)**

Those interested in our ancestors and their place in the natural world will also benefit from the information presented in this book. Indeed, male wolves were better than females at dragging down elk precisely because they were heavier. This is the only in-depth study of a predator-prey system that once dominated the mid-section of the continent.
