Deporting social capital: Implications for immigrant communities in the United States

Lazear EP 1999 Culture and language. Building such a wall would not only be a fiscal and environmental disaster, it would also be an affront to our core values as Americans, and it would make the United States less safe by undermining vital Mexican cooperation—starting with security and migration cooperation.

Deporting social capital: Implications for immigrant communities in the United States

A few examples of foreign or international firms which settled in rural areas and provided at least some economic and social development in the areas around the factory already exist. This is somewhat expected because the last migration is more recent than the first one. The probability of return for those that reportedly saved between 500 and 2500 US dollars is 32% while the probability of return for those that saved more than 2500 US dollars is 22%.
