

# Computer software for field checking aeromagnetic digital data

Geological Survey of Canada - Potensoft: MATLAB

Description: -

- Computer programs Computer software for field checking aeromagnetic digital data

- Computer software for field checking aeromagnetic digital data

Notes: 11

This edition was published in -

Filesize: 10.108 MB

Tags: #Gridding #and #Contouring #Airborne #Geophysical #Survey #Data

## Leica iCON site

Other methods of controlling the vehicle are based on the observation that in VE one need not get from here to there through the intervening space. Interacts with the users Multiprogramming is the capacity of a computer to executing several programs concurrently on the same processor by having one of the programs using the processor while others are performing input or output. IEEE A computer program that creates a single load module from two or more independently translated object modules or load modules by resolving cross references among the modules and, possibly, by relocating elements.

## 5 Information Systems Software

Once the data structures were computed, a display loop could then be entered, in which the viewpoint could be rapidly changed. Personal Information Management Personal Information management PIM packages are tools that help knowledge workers track tasks, people, projects, commitments, and ideas.

### A package for digital processing and automatic contouring of aeromagnetic data

ISO A character string that enables a user to have full or limited access to a system or to a set of data. IEEE Maintenance performed to correct faults in hardware or software. It is a collection of software that handles resources and provides general services for the other applications that run over them.

### Potensoft: MATLAB

IEEE A subprogram that is called by other programs and subprograms. PixelFlow, an architecture for high-speed image generation, overcomes the transformation and frame-buffer access bottlenecks of conventional hardware rendering architectures Molnar et al.
