What Is an HVAC Package Unit? AC & Heat in One System

What Is a Heat Exchanger in HVAC? Census Region and Division: A geographic area consisting of several states defined by the U. Halogen lamps produce a brighter, whiter light than standard incandescent.

Glossary of HVAC terms

Cooling Degree-Days CDD : A measure of how hot a location was over a period of time, relative to a base temperature. A vacant building may contain occupants who are using up to 50 percent of the floorspace.

EIA projects air

Demand Responsive Lighting: An interior lighting control that reduces lighting at times of peak electricity demand. Components made of multiple smaller blades, sometimes adjustable, placed in ducts or duct entries to control the volume of air flow.

Energy consumption in households

Single-family detached homes accounted for 62% of the occupied residential building stock in 2015, and residents in these homes consumed nearly three times more energy on average than residents living in an apartment building with five or more units. Boiler: A type of space-heating equipment consisting of a vessel or tank where heat produced from the combustion of such fuels as natural gas, fuel oil, or coal is used to generate hot water or steam.
