## Macromolecules containing metal and metal

This volume describes what is possible with metal-containing polymers where the metal is an essential ingredient in obtaining desired optical and electronic properties. This volume will cover important biomedical applications of organometallic compounds, including metal-labeled DNA on.

## Macromolecules containing metal and metal

Polymers containing metal or metalloid functions become a natural extension of this effort; just as organic compound drugs have been chemically bound to polymers or physically imbibed into polymer matrices in order to provide a variety of useful advantages, the same opportunities exist for using metal and metalloid species. Pierre Harvey is Professor of Chemistry at the University of Sherbrooke.
