## Theses Collection in the Sudbury Resident Geologist District

Geochemistry of lake sediments and water, Lac Aylmer, Quebec.

## The use of lithogeochemical patterns in wall rock as a guide to exploration drilling at the Jason lead

National Geochemical Reconnaissance lake sediment and water data, northwestern Ontario NTS 42C and 42F south.

## Geological context, mineralization, and timing of the Juramento sediment

This paper summarizes initial results from the mapping program and some key points of the property visit to the Omineca Queen barite occurrence. During the latter part of this time span the Pelly-Cassiar Platform, a positive area with shallow water sedimentation, lay offshore, parallel to the continental platform edge, but separated from it by the Selwyn Basin. The first step in exploring a claim was to dig shallow hand pits in the frozen overburden.
