## Excellence in Sustainability Awards

Or opt for -based products that sustainably store food, are easy to wash, and are even reusable. While LEED-ND, like other , is best known for certifying new green development, its founders always foresaw other uses for the system. Potential store benefits of working with a local farmer include securing fresh product, meeting customer interest in locally grown options, and supporting another community business.

## Technology could help rural areas become thriving and sustainable

Japan is known as one of the most homogenous nations in the modern world, but that is not to say that they have complete equality nor homogeneity across prefect boundaries.

## To Achieve the Sustainable Development Goals, the World Will Have to Think Local

Today, these historic centers offer wonderful urban fabric to build upon in consolidating economic development efforts. From Panama City, Panama and Porto Alegre, Brazil to Accra, Ghana and Can Tho, Vietnam, CRP has engaged over 30 cities across the world on developing investment programs that could be financed with a range of financial instruments. Today, around the world — more than 50% of the global population — live in cities.

## How to achieve a sustainable rural development

Investing in an urban core can help support urban core revitalization efforts, and attract and retain businesses and services. In such cases, cities are stuck between hoping that more money trickles down from the central government or accessing international credit.

## Technology could help rural areas become thriving and sustainable

National governments should enable the legal framework that allow cities and municipalities to borrow in capital markets, notably through the authority to issue bonds and other forms of financing, and to be subject to liability for debts. You can also , , take or. Exhibit 2:Source: adapted from WHO, the World Health Organization.

Communities should take advantage of programs which focus on facilitating the cleanup and reuse of these areas by awarding grants, capitalizing loan funds, providing technical assistance and training, and absolving innocent prospective and contiguous landowners of liability. Among those is an independent municipal investment fund that will exclusively focus on delivering investment to local projects, notably in developing countries and particularly in the least-developed countries—the creation of which was supported by the United Nations Capital Development Fund, United Cities and Local Governments an umbrella organization for local and regional governments around the world , and the Global Fund for Cities Development their technical partner. ## **Cities**

Small farms located near rural grocery stores have the potential to be an additional source of healthy and tasty fresh produce. Emphasis should be placed upon the creation of a diverse mix of uses and housing options within communities, such as an infill redevelopment instead of developing on open spaces.

## **Submit an idea to RSDP**

And new generations will probably live even longer. In Sustainability for all we promote the awareness and diffusion of good practices that allow to combine economic and social development with the preservation of natural resources.
