Developing Brain Computing Lab

As mentioned in the introduction to adolescence, too many who have read the research on the teenage brain come to quick conclusions about adolescents as irrational loose cannons. In girls there is a higher proportion of gray matter associated with stronger verbal skills and multitasking, while in boys there is a higher proportion of white matter connected with spatial skills. In the brain, these points of convergence are called nuclei.

Developing Brain Research Laboratory

Some of the most developmentally significant changes in the brain occur in the prefrontal cortex, which is involved in decision making and cognitive control, as well as other higher cognitive functions. These periods of time are called critical periods or sensitive periods. This inhibition of BMP4 causes the cells to differentiate into neural cells.
