## Self

Five broad categories of knowledge were identified as needing to be addressed: appreciating a different way of living; valuing community; being holistic; respecting traditional knowledge and Inuit Qaujimajatuqangit; and communicating with respect.

## Public health

The initiative also encouraged and examined the greater use of information technology IT systems to support communications, care and record-keeping. This initiative was implemented over 29 months, from November 2003 to March 2006.

## Putting Your Health First During the COVID

In recognition of the role of interdisciplinary collaboration in advancing PHC reform, and that the move towards interdisciplinary health care would require providers to develop new skills and demonstrate new behaviours, the four Atlantic provinces-Nova Scotia the lead province , New Brunswick, Prince Edward Island, and Newfoundland and Labrador-undertook the Building a Better Tomorrow BBT initiative. Mate and Rakover 2016 examined the concept of sustaining improvement in health care, taking into account changes in the Saskatoon Health Region now part of the Provincial Health Authority during this time of transformation, emphasizing the critical role of leadership both at the unit level and on the front line.

## Why We Need Health Care Reform in the US

Telehealth service was extended to all communities in the Sioux Lookout Health Zone and Beausoleil First Nation on Christian Island.

## Emerging Nursing Leadership Issues

The PHCTF played a significant role in supporting the provinces and territories' shift toward a more collaborative approach to care through the Provincial-Territorial and Multi-Jurisdictional Envelopes. From Surviving to Thriving: Navigating the First Year of Professional Nursing Practice 2nd ed.

### **Putting Our Health First**

To achieve this, Yukon's initiatives centred on two objectives: to increase the emphasis on health promotion, disease and injury prevention and management of chronic diseases; and to facilitate coordination and integration with other health services. A forum gave provincial, territorial and international representatives an opportunity to share their successes, challenges and effective strategies for addressing barriers to implementation.

### **Key Commission Documents**

This national initiative, led by the Canadian Alliance of Community Health Centre Associations CACHCA , aimed to tailor and disseminate these resources produced in Ontario, primarily to CHC staff across Canada and secondarily, to other PHC providers beyond CHCs. Implementation of EMRs requires change management and guidance in practice settings, and these supports have not traditionally been provided. You may expect changes in license requirements in the future as more people get more access to mental health care.
