Impacts of social distancing policies on mobility and COVID

Thus, critical realism provides a strong

philosophical ground for this qualitative research study.

Implementing social distancing policy measures in the battle against the coronavirus: protocol of a comparative study of Denmark and Sweden

Conclusion The proposed methodology allows a robust qualitative assessment of factors hindering and facilitating the implementation and delivery of social prescribing interventions, as well as factors affecting the engagement, and non-engagement, of service users.

The Missing Link in COIL

This metric is estimated as 24 minus the population-averaged number of hours spent at places of residence and compared to the same baseline as used in the Community Mobility Reports. Background Social distancing policies to ensure physical distance between people have become a crucial strategy in the battle against the spread of the coronavirus.

Evaluating the Implementation and Delivery of a Social Prescribing Intervention: A Research Protocol

There is also a need to investigate how measures are perceived, accepted or not , and acted upon and complied with by the public and by different groups of citizens in society. The impact of mass gatherings and holiday traveling on the course of an influenza pandemic: a computational model. While these are effective solutions to specific challenges, more holistic and systemic approaches are required to scale and sustain COIL.

The economics of the implementation of social policy: Searching for the missing link

Overcoming theory-practice inconsistencies: Critical realism and information systems research.
