A survey of modern numerical analysis. Ramos Roundoff Error Analysis of the Fast Fourier Transform. A final remark, which we do not elaborate, is the following.

A SURVEY OF NUMERICAL MATHEMATICS BY DAVID M YOUNG

Report CNA-192, Center for Numerical Analysis, University of Texas at Austin, April 1984. Multigrid methods with application to reservoir simulation.

Logarithms (Part I?)

The piogramming of this method, which is essentially equivalent to the Gaussian elimination method for the solution of a system of linear equations, or the invcision of a matrix, is not a task for a novice. Weighted minimax approximations for optimal external smoothing. Report TNN-96, Computation Center, University of Texas at Austin, Austin, TX, USA, September 1969.

A Survey of Numerical Mathematics, Vol. 2 (豆瓣)

Some parallel algorithms on the four processor Cray X-MP4 supercomputer.

Reconsidering Area Approximations on JSTOR
